Kerry Britton, USDA Forest Service

Together we can prevent the next invasion!

The effort to control invasive species will only be successful with support from the public. There is too much ground to cover and we need your help! This weed identification guide was developed to help individuals identify and report the weeds that have been given priority for early detection and rapid response in Multnomah County and the Sandy River Basin.

To become a Weed Watcher or to get more booklets contact Lucas Nipp at 503-935-5363.
