F.I.S.H = Financial Incentives for Sustainable Habitats

Thank you to all applicants that submitted a fish grant! We had an excellent group of grants submitted this round. The following grants were ranked the highest and provided partial funding. All grants this round were only rewarded partial funding due to a variety of concerns by the committee which were unique to each grant application and budget constraints. Please see the following regarding the grants awarded this round.

All grant applications submitted will be receiving a more in-depth letter regarding the decisions made and follow-up actions needed.

A more detailed release about these projects will be coming soon.

Once again, thank you to all that expressed an interest in FISH!
